# Accelerating the Evolution of HTML5

Create applications of superior quality with the unrivaled authoring features of Montage Studio.

Application creation, redefined.

Build engaging applications

Craft powerful, future-proof applications that seamlessly blend 2D and 3D content, exceed user expectations, and drive cross-screen engagement.

Work faster together

Reduce overall development time by splitting complex projects into simple, reusable components that your team can work on in parallel.

Iterate quickly with modular design

Discover the benefits of component-oriented templates that let designers focus on HTML and CSS, while developers implement the behavior and business logic.

Experience instant feedback

Use Montage Studio to stream your application to anyone, anywhere and get feedback on your changes in real time.

Collaborate with GitHub

Log into Montage Studio with your GitHub account. Every Montage Studio project is a GitHub repository, which means you can take advantage of GitHub's powerful collaborative features.

Leverage MontageJS

Build high performance, easy-to-maintain applications on top of MontageJS. This elegant, open source HTML5 framework (BSD license) rivals native SDKs, yet is easier to learn.
